

This is a small wallhanging / table topper finishing at about 32 inches square without borders.

Needs list

Choose your fabrics from 2 colour families that go together. Fabrics ABC are from one family and DEF from the other.

A – light – 0.5m	D – dark – 0.5m
B – very light – 0.5m	E – medium – 0.5m
C – med/bright – 0.25m	F – bright – 0.25m

F could be a print which reads as colour family 2 but has some colour 1 in it.

Borders will probably look best with fabrics C, F, E or D so make sure you can get more of any of these, just in case. You won't know which of them (if any) will look good until the quilt top is finished – we changed our minds several times during the making!

This is Chris's final fabric choice – A on the left to F on the right. Notice that B (very light) is actually white and not a shade of green (Family 1) at all.
